# PRELIMINARY FINDINGS ON YOUTH DISPOSITION.

(Disposition = ways they interact with their friends, other students and their families, and experience or behaviours they demonstrate through these interactions)

SELF

FAMILY

FRIENDS

SCHOOL

BOYS have a **more positive disposition for SELF** compared to GIRLS

GIRLS have a **less positive disposition for SELF** compared to boys, but a **more positive disposition for FAMILY, FRIENDS and SCHOOL**

The 2018 study discovers a significant difference in disposition between those who have been cyberbullied and those who say they have not.

Youths who have been cyberbullied showed less positive disposition for SELF, FAMILY, FRIENDS and SCHOOL.

This disposition leads to a **higher likelihood of being bullied.**

TOP 3

ACTIONS TAKEN BY BOYS

To stop cyberbullying

- ✓ Searched for advice on the internet to solve the problem
- ✓ Reported to the administrator
- ✓ Felt that the bully was stupid and pitiful

TOP 3

ACTIONS TAKEN BY GIRLS

To stop cyberbullying

- ✓ Changed my settings so that the person cannot contact me
- ✓ Asked a friend, sibling or adult for advice
- ✓ Stopped using the internet for some time

## FINDINGS ON ACTIONS TAKEN AFTER BEING CYBERBULLIED:

Both males and females are able to take positive action to stop or prevent further bullying

Both males and females sought advice to stop or prevent bullying

### CHANGE INTERNET SETTINGS

While **84%** of girls changed internet settings to avoid contact

Only **16%** of boys did so.

### STOPPED USING INTERNET

While **68%** of females stopped using the internet for a while

Only **31%** of boys did so.

Overall finding on **ACTIONS TAKEN** corresponds to the finding on overall **POSITIVE DISPOSITION** among schoolchildren.
